DigitalHive.

Features Datasheet

Your Intelligent Enterprise Portal

Built around the habits of the end-user and their interactions, Digital Hive is highly adaptable, flexible and secure, providing users with a seamless and consistent view of information assets in one place. Our easy to use super-smart interface makes searching for content faster than ever before.

Building Blocks of Excellence

Building Intelligence, Delivering Personalized Insights Straight to Users

Starting at the login, our personalization extends across the product and beyond. From deciding what reports to execute for each user, or time of the week to keep them informed and engaged, we want our users to spend less time searching for a report to run that might not even exist, and more time understanding something that has a positive business impact.

Building Intelligence, Delivering Personalized Insights Straight to Users

Catalog

Digital Hive's Catalog is your one-stop-shop for all your content. Digital Hive's self-service catalog helps users and customers collect, organize, access, and enrich metadata to support data discovery and governance.

Connectors

Through a wide range of pre-built connectors, Digital Hive makes it easy for users to access all reports from your existing business systems in real-time.

Search

With Google like speed, users can easily search across all business systems and find their desired reports, presentations, videos and more.

Hive IQ

Think of Hive IQ as your "Netflix for BI". Hive IQ recommends and delivers personalized content straight to the user - uncovering new insights from multiple business systems.

Storyboards

Remix your business reports and analytics assets with videos and visuals to help tell a story.

Customization

Set up your own folder structure and bring together assets from multiple sources into a single customized view.

Security

Leverage and take advantage of the security you've already defined within your business systems. Log in once, access everything.

SDK

Organizations often have a desire to build specific portals for unique purposes or integrate with existing business applications.

Audit

With Digital Hive Audit, make informed budget allocation decisions, track towards engagement goals and provide the company with a reliable ROI for all data & analytics investments.

Branding

Digital Hive enables businesses to create unique experiences that align with specific corporate branding guidelines.

Data Stories

Digital Hive increases access and improves collaboration providing an extra layer of context to the data, helping users to see the complete 'data story'.

Integrated Applications

Digital Hive enables you to have reports, presentations, videos and more, side by side in a single view, regardless of the business system they reside in. Provide users with the necessary context to make better informed decisions.

Enterprise Portal Solutions

Delivering award-winning enterprise portal solutions, helping organizations to use more of what's out there...
