Simplify, Modernize & Stay Competitive

Consumer applications like Netflix, Spotify and Amazon are altering the expectations of enterprise analytics. Personalized analytics needs to be surfaced and recommended directly to the consumer in one place.

Digital Hive allows businesses to simplify and modernize the user experience, by re-packaging all your existing technology investments with a single intelligent enterprise portal, providing a seamless experience across multiple platforms.

Users no longer need to know what system analytics live in (Cognos, Qlik or Tableau for example), or have to spend hours searching for information inside each individual systems. With Digital Hive it's at their fingertips. It's as simple as logging in once and being greeted with intelligence.

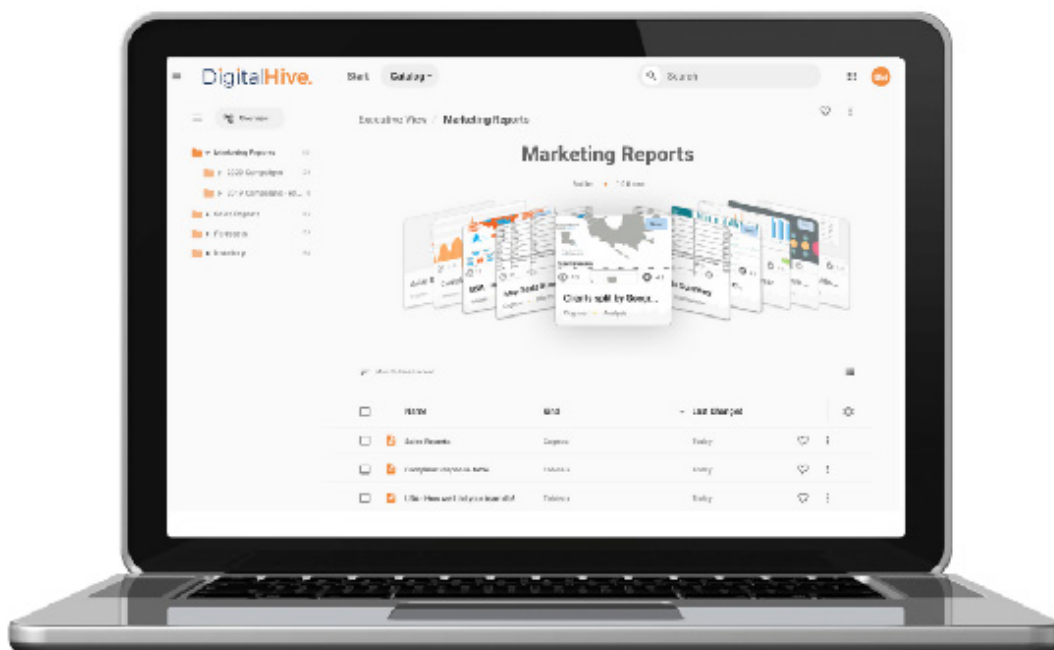

Organize All Of Your Content In A Structured Way

Digital Hive's analytics catalog lets you organize millions of information assets across multiple systems, in an intuitive and user-friendly way. Create your own folder structures, organize relevant content, tag and bookmark frequently used assets for quick access.

Increase collaboration and provide a feedback loop with your peers across the business by add star ratings and commentary to reports and information assets.

Connect, Create & Engage

Digital Hive is designed to have you up and running in weeks. We're set up to connect directly to all underlying analytics, BI and content management systems in real-time. All you have to do is put in your connector details!

Whether you're standardizing or centralizing, we offer a seamless migration path to minimize any potential end user disruption.

Business Intelligence and Analytics Systems

IBM Cognos Analytics, IBM Planning Analytics, Oracle BI (OBIEE), IBM Cognos 10, Qlik Sense, QlikView, IBM TM1, Looker, Salesforce, SAP Analytics Cloud, Microsoft PowerBI, SAP Business Objects, Microsoft SSRS, Splunk, MicroStrategy, Tableau, ThoughtSpot, TIBCO Spotfire

Content Management Systems

Box, Microsoft SharePoint, File System, Microsoft SharePoint Online, Google Drive, Microsoft OneDrive

Make Digital Hive The Entry Point To Your Day

We don't just surface analytics content... we can create a portal experience for pretty much anything! Whether you need a platform to consolidate your existing Analytics & BI tools, a sophisticated company intranet, or a branded analytics portal for customers, Digital Hive can help you design and deploy a slick and secure intelligent enterprise portal, leveraging all of your technology to provide everyone with direct access to the information they need, exactly when they need it. Create multiple experiences for internal and external users, repurposing your favorite reporting assets (regardless of the system), all in a matter of minutes.

Intranet

Analytics Hub

Customer Portal

Extranet

Custom Hive

“Our people have an ‘intranet on steroids’ that’s easy to use and access reports and other policy documents and information from. At the same time, we maintain our strategy of using the most suitable BI tool for each job.”

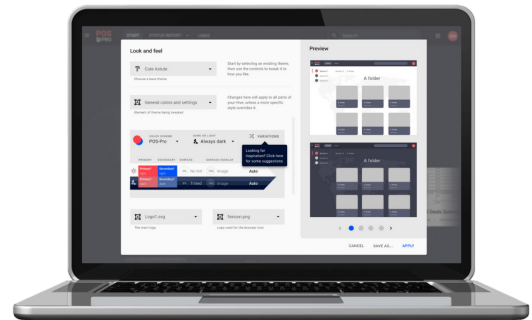

Create And Tell Captivating Data Stories

Digital Hive's storyboards make it easy for users to tell a datastory, utilizing curated assets that exist in all of your BI, content and video systems – enabling data literacy and providing insight to make effective data-driven decisions across the business.

Brand Your Digital Experience

Digital Hive gives you the ability to align your portal experience for every internal and external user. We make it simple for organizations to make it feel like an extension of the business. You can also set up different business units, customers, or suppliers to have their own custom-branded portals.

Design and Build Your Own Portal

With Digital Hive's SDK, you can build a scalable portal experience across your enterprise, driving business benefit and supporting digital transformation projects. Accelerate your custom development timelines, saving time, money and resources. Let us do the heavy lifting.

Scale Enterprise-Wide with confidence and succeed

High Availability

We provide redundancy and fault tolerance so the system will always be available regardless of what happens.

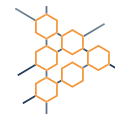

Authentication

To harmonize all your enterprise authentication providers, we support access to SSO, LDAP, SAML, OKTA and AD integration.

Security

We inherit all the security from all underlying business systems, eliminating any additional set up and ongoing maintenance.

Unlimited Connectors

We don't charge you for connector licenses. Add as many business systems as you need enabling enterprise wide deployment.

Administration

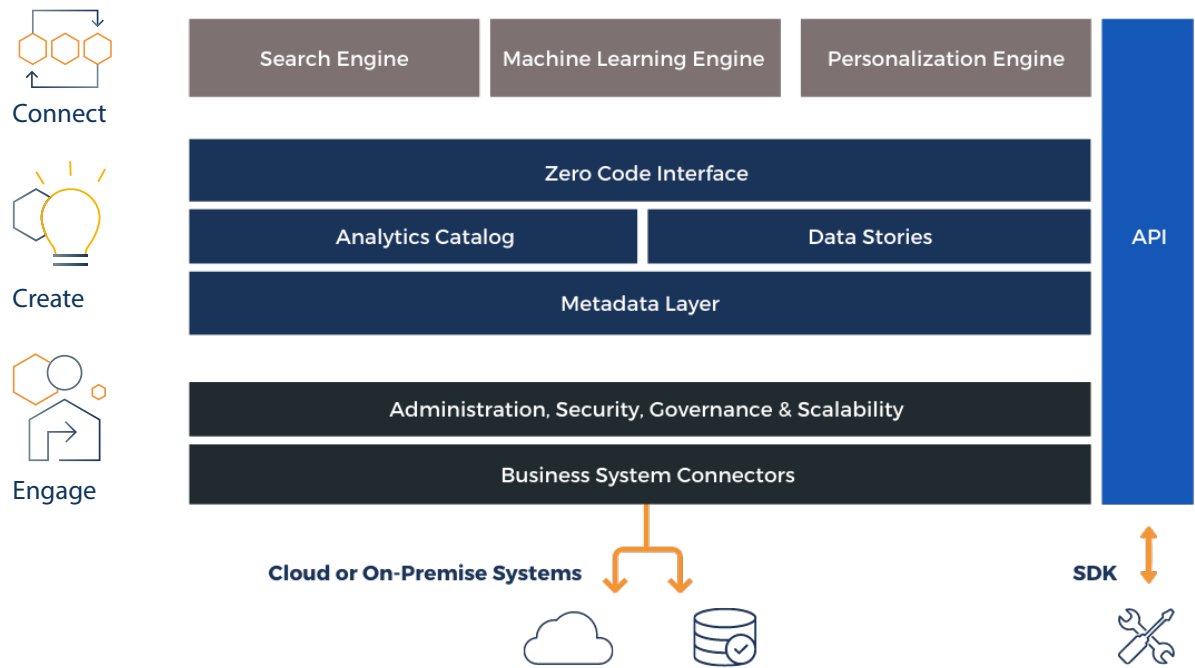

Intuitive codeless interface for administration to add connectors, security and storyboards. Up and running in hours.

Auditing

Monitor auditing to establish usage patterns for BI adoption. Track users behavioural patterns and reporting activity – reducing licence costs.

Purpose built from the ground up

DigitalHive.

Personalize your working day.
